Case Studies

- BXMT proactively manages assets to reduce credit risk over time, enhancing outcomes even when business plans face challenges
- BXMT loans carry structural benefits such as extension tests, guarantees, and approvals over major decisions, which facilitate risk management over time

London Office

In Q4 2023, a £32M loan on a vacant London office building was fully repaid at par; since origination in 2019, BXMT completed two loan modifications, securing £10M of loan repayments

- **Q2 2019: Origination**
 - Originated £53M (£42M funded at close), 61% LTV senior loan for acquisition and refurbishment of an 89k sf, 2004 vintage Class A office building in the City of London
 - Business plan to renovate asset following prior tenant vacate & deliver to WeWork under full building 15-year lease
 - Loan was sized, underwritten & structured to account for downside scenario where WeWork failed
- **Q4 2020: Loan Modification #1**
 - Prior tenant relocation delayed due to COVID-19 pandemic
 - Modification allowed 1-year lease extension in exchange for **£8M incremental equity commitment**, including **£3M loan repayment**
- **Q2 2023: Loan Modification #2**
 - Given deterioration of WeWork credit and broader office market challenges, Sponsor opted to terminate lease and pursue a sale of the vacant asset
 - Termination required BXMT consent given **lease approval rights**
 - BXMT approved a short-term extension to facilitate sale in exchange for a **£7M repayment and cancellation of £11M future funding**
- **Q4 2023: Repayment**
 - Asset sold for £49M to institutional buyer, resulting in a **full par repayment** of BXMT's loan
 - Sale price at 1.5x+ of BXMT's basis, implying exit LTV of 66%

DEFINITIONS

Distributable Earnings: Blackstone Mortgage Trust, Inc. (“BXMT”) discloses Distributable Earnings in this presentation. Distributable Earnings is a financial measure that is calculated and presented on the basis of methodologies other than in accordance with generally accepted accounting principles in the United States of America (“GAAP”).

Distributable Earnings is a non-GAAP measure, which is defined as GAAP net income (loss), including realized gains and losses not otherwise recognized in current period GAAP net income (loss), and excluding (i) non-cash equity compensation expense, (ii) depreciation and amortization, (iii) unrealized gains (losses), and (iv) certain non-cash items. Distributable Earnings may also be adjusted from time to time to exclude one-time events pursuant to changes in GAAP and certain other non-cash charges as determined by BXMT’s manager, subject to approval by a majority of its independent directors. Distributable Earnings mirrors the terms of BXMT’s management agreement between BXMT’s Manager and BXMT, for purposes of calculating its incentive fee expense.

BXMT’s CECL reserves have been excluded from Distributable Earnings consistent with other unrealized gains (losses) pursuant to its existing policy for reporting Distributable Earnings. BXMT expects to only recognize such potential credit losses in Distributable Earnings if and when such amounts are realized and deemed non-recoverable upon a realization event. This is generally at the time a loan is repaid, or in the case of foreclosure, when the underlying asset is sold, but realization and non-recoverability may also be concluded if, in BXMT’s determination, it is nearly certain that all amounts due will not be collected. The timing of any such credit loss realization in BXMT’s Distributable Earnings may differ materially from the timing of CECL reserves or charge-offs in BXMT’s consolidated financial statements prepared in accordance with GAAP. The realized loss amount reflected in Distributable Earnings will equal the difference between the cash received, or expected to be received, and the book value of the asset, and is reflective of its economic experience as it relates to the ultimate realization of the loan.

BXMT believes that Distributable Earnings provides meaningful information to consider in addition to net income (loss) and cash flow from operating activities determined in accordance with GAAP. BXMT believes Distributable Earnings is a useful financial metric for existing and potential future holders of its class A common stock as historically, over time, Distributable Earnings has been a strong indicator of its dividends per share. As a REIT, BXMT generally must distribute annually at least 90% of its net taxable income, subject to certain adjustments, and therefore BXMT believes its dividends are one of the principal reasons stockholders may invest in BXMT’s class A common stock. Distributable Earnings helps BXMT to evaluate its performance excluding the effects of certain transactions and GAAP adjustments that BXMT believes are not necessarily indicative of BXMT’s current loan portfolio and operations and is a performance metric BXMT considers when declaring its dividends.

Furthermore, BXMT believes it is useful to present Distributable Earnings prior to charge-offs of CECL reserves to reflect BXMT’s direct operating results and help existing and potential future holders of BXMT’s class A common stock assess the performance of BXMT’s business excluding such charge-offs. BXMT utilizes Distributable Earnings prior to charge-offs of CECL reserves as an additional performance metric to consider when declaring BXMT’s dividends. Distributable Earnings mirrors the terms of BXMT’s Management Agreement for purposes of calculating BXMT’s incentive fee expense. Therefore, Distributable Earnings prior to charge-offs of CECL reserves is calculated net of the incentive fee expense that would have been recognized if such charge-offs had not occurred.

Distributable Earnings and Distributable Earnings prior to charge-offs of CECL reserves do not represent net income (loss) or cash generated from operating activities and should not be considered as alternatives to GAAP net income (loss), or indicators of BXMT’s GAAP cash flows from operations, measures of BXMT’s liquidity, or indicators of funds available for BXMT’s cash needs. In addition, BXMT’s methodology for calculating Distributable Earnings and Distributable Earnings prior to charge-offs of CECL reserves may differ from the methodologies employed by other companies to calculate the same or similar supplemental performance measures, and accordingly, BXMT’s reported Distributable Earnings and Distributable Earnings prior to charge-offs of CECL reserves may not be comparable to similar metrics reported by other companies.

Non-Consolidated Senior Interests: Senior interests in loans originated and syndicated to third parties. These non-recourse loan participations, which are excluded from the GAAP balance sheet, constitute additional financing capacity and are included in discussions of the loan portfolio.

Net Loan Exposure: Represents loans that are included in BXMT’s consolidated financial statements, net of (i) asset specific debt, (ii) participations sold, (iii) cost-recovery proceeds, and (iv) CECL reserves on its loans receivable.

ENDNOTES RELATING TO EARNINGS RELEASE

- a. Represents new loan originations of \$69M and debt buybacks of \$60M during the twelve months ended June 30, 2024. Excludes upsizes of existing loans.
- b. Based on Net Loan Exposure. See Definitions for definition.
- c. Reflects weighted average loan-to-value (“LTV”) as of the date investments were originated or acquired by BXMT excluding any loans that are impaired and any junior participations sold.
- d. Based on Net Loan Exposure of related loans as of the quarter-end prior to resolution.
- e. Represents debt-to-equity ratio, which is the ratio of (i) total outstanding secured debt, asset-specific debt, term loans, senior secured notes, and convertible notes, in each case excluding unamortized deferred financing costs and discounts, less cash, to (ii) total equity.
- f. States and countries comprising less than 1% of total loan portfolio are excluded.
- g. Assets with multiple components are proportioned into relevant collateral types based on the allocated value of each collateral type.
- h. Includes repayments through July 23, 2024.
- i. Reflects full loan repayments.
- j. Excludes 1.0% per annum of scheduled amortization payments under the Term Loan B.
- k. Certain loans include an aggregate \$725M of Non-Consolidated Senior Interests that are not included in BXMT’s consolidated financial statements and exclude \$101M of junior loan interests that BXMT has sold, but that remain included in BXMT’s consolidated financial statements as of June 30, 2024. Total loan includes unfunded commitments.
- l. Date loan was originated or acquired by BXMT. Origination dates are subsequently updated to reflect material loan modifications.
- m. The weighted-average cash coupon and all-in yield are expressed as a spread over the relevant floating benchmark rates. Excludes loans accounted for under the cost-recovery and nonaccrual methods, if any.
- n. Maximum maturity assumes all extension options are exercised; however, floating rate loans generally may be repaid prior to their final maturity without penalty.
- o. Represents net loss attributable to Blackstone Mortgage Trust, Inc.
- p. Represents realized losses related to loan principal amounts deemed non-recoverable during the three months ended June 30, 2024 and March 31, 2024.
- q. Represents realized gains (losses) on the repatriation of unhedged foreign currency. These amounts were not included in GAAP net loss, but rather as a component of other comprehensive income in BXMT’s consolidated financial statements.
- r. Reflects the \$6M of incentive fee expense that would have been incurred if such charge-offs had not occurred in the three months ended March 31, 2024.
- s. The weighted-average shares outstanding, basic, exclude shares issuable from a potential conversion of BXMT’s convertible notes. Consistent with the treatment of other unrealized adjustments to Distributable Earnings, these potentially issuable shares are excluded until a conversion occurs.
